RE: recommendation

Hello:

I would like to take this opportunity to recommend Thomas Huff as an excellent addition to your staff or crew. Thomas was a student in the Integrated Media program at MHCC studying video production. He was an good student who showed skill in many aspects of media production. He worked well with others and had a talent for offbeat comedic videos which he wrote, directed and starred in.

The Integrated Media department at MHCC has a long history of training successful video producers. Its curriculum builds a solid foundation around traditional video production. However, the department also incorporates training in; pre and post-production planning, digital non-linear editing and a series of courses in script and proposal writing which are aimed at developing a broad understanding of current digital media tools. As part of the IM cohort Thomas has taken course work that is team oriented where he adapted quickly to roles, working equally well as the team leader or crew member.

I believe Thomas Huff would be a excellent member of your production team.

Sincerely,

Jack Schommer
