**Letter of Recommendation**

I can confidently recommend Tommy Huff as a qualified and capable video creative.

As a video emphasis student within the communication degree, Tommy has had responsibilities, as both camera operator and editor on studio and location based projects. He was consistently successful in overseeing video content creation to exacting specifications, whilst maintaining the respect and confidence of the creative teams he worked with. Tommy has a sound technical understanding of what constitutes quality video production: lighting, composition, sound acquisition, directing talent, conducting interviews and editing coherent narratives.

There were many times when I was impressed with Tommy's capacity to coordinate, stay organized and maintain high standards of video production value across multiple projects. His reporting of progress, and the management of project expectations was always clear, and his deadlines met. Tommy communicates well and his amiable demeanor has his well suited to working effectively in collaborative creative environments.

I have worked at BYU Idaho for just over 6 years. Prior to that I owned and operated a creative business in the UK for over ten years, working closely with private and public sector clients and agencies in London and beyond. It is with this experience that I again commend Tommy to you.

Sincerely yours,

**Christian Mawlam**  
Professor of Communication  
Brigham Young University-Idaho  
Department of Communication
